

Enterprise Cheshire + Warrington

Sustainability Policy

Reference: ECW009
Version: 2
Revised: March 2025
Review Date: March 2026

Statement of Intent

ECW recognises that it has a responsibility to improve the sustainability of economic development in the Cheshire and Warrington region and to improve the environmental performance of ECW as an operating company. In doing so, it will also support the aims of stakeholders who share a common objective to improve sustainability.

Sustainability will be placed at the heart of decision making and operational service delivery.

Key Commitments

Project Investment

When assessing and evaluating project business cases for investment, ECW will consider the environmental benefits and impacts of the proposals. Contract agreements will ensure compliance with minimum environmental standards and encourage higher standards to be achieved.

Comply with Environmental Legislation

ECW will comply with all relevant environmental legislation, regulations, and requirements in so far as they apply to the operations and decisions of ECW.

Travel and Sustainability

Staff, board, and committee members will be encouraged, in the first instance, to use available technologies to reduce the need for travel. Where travel is necessary, public transport will be the preferred choice, with use of private vehicles kept to a minimum.

Minimise Consumption and Waste

ECW will reduce use, re-use and recycle resources, as far as is practicable and ensure responsible disposal of all its residual waste. ECW, as a tenant, is not separately metered for electricity or water consumption but will, nevertheless, take measures to reduce unnecessary consumption.

Each organisation involved in delivery of contracts (ECW and any sub-contractors) will:

- dispose of waste using a registered waste collector and
- observe and comply with the Waste Electrical and Electronic Equipment (WEEE) regulations to ensure that WEEE is not mixed with general waste and is disposed of legally.

All such organisations will be requested to provide regular updates on their sustainable performance plan, to inform ECW's monitoring systems.

Purchase Sustainably

ECW will select goods and services using purchase criteria which balance economic, social and environmental factors, including reducing the 'supplier miles' to deliver those goods and services.

Enterprise Cheshire + Warrington

Raise Awareness

ECW will raise awareness of this policy and related sustainability issues among its staff, contractors, service users, partners, and visitors.

Monitoring and Management

ECW will measure and monitor its progress against targets within the Action Plan and strive to adopt best practice. We will establish KPI reporting, redefining targets and updates to this policy as appropriate.

Action Plan

See Annex B.
