Methodology

Report references and data sources

Report references and official data sources used in this pack are noted on the bottom right corner of each page. A comprehensive list of reports and data sources used in this pack is available on pages 6 and 7.

Geography, comparators and temporality

The analysis has considered C&W as a whole, but also variation within the LEP area. This involves looking at differences between the three local authorities, as well as identifying patterns at the small area level, data permitting.

Comparators have been used to provide context for C&W's performance, data permitting. This includes similar successful areas of fast economic growth, such as Enterprise M3 (EM3) and Greater Manchester (GM). Some outputs from the SEP may refer to alternative comparators, such as GFirst or Coventry and Warwickshire. Performance in C&W will also be compared to the regional level to the North West (NW) and at the national level to the United Kingdom (UK), Great Britain (GB) or England.

Throughout, the most up to date data has been used, except where analysis has been taken from the SEP, which uses the most up-to-date data available at the time, which may refer to an older release than data used elsewhere.

Where possible, temporal data and change over time has been used to contextualise current performance and show trends. In some cases, data is not available for previous years or may use a different methodology and not be comparable.

Key sectors

Analysis of the key sectors is carried out using the SIC code definitions stated on pages 8-9. Please note there is some overlap between a) manufacturing and energy and environment (shown in this colour) and energy and environment and life sciences (shown in this colour).

GVA

For GVA, GVA per head and GVA per job by broad sector from the December 2018 release, the December 2018 GVA deflator is used. Other GVA figures updated earlier in the analysis process, such as GVA per hour worked and GVA per job by sub-sector, use the February 2017 deflator. GVA is deflated to give values in 2017 terms.

GVA figures from the SEP evidence base use historic deflators and are not in 2017 terms.

Economic growth ambition

To track C&W's progress, we generate a base case trajectory which shows the implied level of growth if C&W follows average growth. This is based on average GDP growth in the UK over the last 20 years (at the time the SEP evidence base was written) at 1.9% a year and the average annual GVA growth of C&W over the past 20 years at 1.8%. The average of 1.85% is applied.

To reach the £50bn target by 2040 a compound interest formula has been used over 27 periods between 2013 and 2040. This gives the required annual growth rate. C&W must meet or exceed this rate to meet its target.

To understand how C&W is performing relative to this target, the £50bn figure has been converted to 2017 prices.

GVA and GVA per job (productivity) at the broad sector group level

GVA and GVA per job at the broad sector group level (definitions set out on page 10) are calculated using the ONS regional gross value added (balanced) reference tables for combined authority, city region and other economic and enterprise regions, and country and region, and ONS Business Register and Employment Survey (BRES). This data was released in December 2018 for the year of 2017. We have also used jobs data from 2017 to calculate GVA per job. Please note that elsewhere in the pack, where analysis was conducted in September 2018, jobs are quoted for 2016. There are no overlaps where broad sector groups are used.

GVA and GVA per job (productivity) at the sub-sector level

GVA and GVA per job at the sub-sector level are calculated using the ONS Regional gross value added (balanced) reference tables for NUTS 2* and ONS Business Register and Employment Survey for 2016.

Data from the December 2017 release has been used to analyse subsectoral productivity, as this dataset is more detailed with a greater number of SIC2 sub-sectors (70 compared to 34 in the December 2018 release).

Please note, that for GVA available at the SIC2 sub-sectoral level, some SIC2 codes are aggregated and only available at this level e.g. manufacture of petroleum, chemicals and pharmaceuticals. Disaggregating these groups of SIC2 codes would undermine the robustness of the data. Therefore, the SIC code definitions of the key sectors when analysing productivity may differ as is set out on page 11.

Business birth and death rates

These are expressed as a proportion of the active business population

for that year.

Qualifications and occupations

An in house model is used to calculate qualification and occupation figures at the small area level using an in house model based on a combination of Census and Annual Population Survey data.

Population clusters

We use an in house model, based on a range of socio-economic variables, to group small areas according to the socio-economic characteristics of their residents.

Rural and town analysis

Where small area level data is available, it has been used to analyse the social and economic characteristics of C&W's rural areas and towns. Small area level data has been aggregated for the five principal towns of Chester, Crewe, Ellesmere Port, Macclesfield and Warrington using the MSOA 2011/01 definitions listed on pages 12-14, depending upon the data source. The number of jobs and businesses in 2012 is calculated using MSOA 2001 definitions of the towns. The rural area is considered to be the areas of C&W outside of these five towns.

Sector definitions

Manuf	acturing (excluding chemicals and pharmaceuticals)
10	Manufacture of food products
11	Manufacture of beverages
12	Manufacture of tobacco products
13	Manufacture of textiles
14	Manufacture of wearing apparel
15	Manufacture of leather and related products
16	Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials
17	Manufacture of paper and paper products
18	Printing and reproduction of recorded media
19	Manufacture of coke and refined petroleum products
22	Manufacture of rubber and plastic products
23	Manufacture of other non-metallic mineral products
24	Manufacture of basic metals
25	Manufacture of fabricated metal products, except machinery and equipment
26	Manufacture of computer, electronic and optical products
27	Manufacture of electrical equipment
28	Manufacture of machinery and equipment n.e.c.
29	Manufacture of motor vehicles, trailers and semi-trailers
30	Manufacture of other transport equipment
31	Manufacture of furniture
32	Other manufacturing
33	Repair and installation of machinery and transport

Chemi	cals
20	Manufacture of chemicals and chemical products
Energy	and environment
08990	Other mining and quarrying n.e.c.
19201	Mineral oil refining
19209	Other treatment of petroleum products (excluding oil refining/petrochemicals manufacture)
25300	Manufacture of steam generators, except central heating hot water boilers
27900	Manufacture of other electrical equipment
29100	Manufacture of motor vehicles
29201	Manufacture of bodies (coachwork) for motor vehicles (except caravans)
29320	Manufacture of other parts and accessories for motor vehicles
35110	Production of electricity
35120	Transmission of electricity
35130	Distribution of electricity
35140	Trade of electricity
35210	Manufacture of gas
35220	Distribution of gaseous fuels through mains
35230	Trade of gas through mains
35300	Steam and air conditioning supply
39000	Remediation activities and other waste management services
42210	Construction of utility projects for fluids

Energy	and environment (continued)
42220	Construction of utility projects for electricity and telecommunications
42910	Construction of water projects
42990	Construction of other civil engineering projects n.e.c.
71121	Engineering design activities for industrial process and production
71122	Engineering related scientific and technical consulting activities
71129	Other engineering activities (not including engineering design for industrial process and production or engineering related scientific and technical consulting activities)
71200	Technical testing and analysis
72110	Research and experimental development on biotechnology
72190	Other research and development on natural sciences and engineering
Life sci	ences (including pharmaceuticals)
2110	Manufacture of basic pharmaceutical products
2120	Manufacture of pharmaceutical preparations
46460	Wholesale of pharmaceutical goods
72110	Research and experimental development on biotechnology
72190	Other research and development on natural sciences and engineering
Finance	e and business services
64	Financial service activities, except insurance and pension funding
65	Insurance, reinsurance and pension funding, except compulsory social security
66	Activities auxiliary to financial services and insurance activities

77	Rental and leasing activities
78	Employment activities
79	Travel agency, tour operator and other reservation service and related activities
80	Security and investigation activities
81	Services to buildings and landscape activities
82	Office administrative, office support and other business support activities
Logisti	cs and distribution
Logisti 49	cs and distribution Land transport and transport via pipelines
49	Land transport and transport via pipelines
49 50	Land transport and transport via pipelines Water transport

GVA per job broad sector group definitions

Primary industries and energy, water and waste

- A Agriculture, forestry and fishing
- B Mining and quarrying
- D Electricity, gas, steam and air conditioning supply
- E Water supply; sewerage and waste management

Manufacturing

C – Manufacturing (including chemicals and pharmaceuticals)

Construction

F – Construction

Retail and hospitality

- G Wholesale and retail trade; repair of motor vehicles
- I Accommodation and food service activities

Transportation and storage

- H Transportation and storage
- Information and communication
- J Information and communication

Finance and insurance

K - Financial and insurance activities

Real estate

L - Real estate activities

Professional, scientific and technical activities

M - Professional, scientific and technical activities

Administrative and support services

N - Administrative and support service activities

Public services

- O Public administration and defence
- P Education
- Q Human health and social work activities

Other services

- R Arts, entertainment and recreation
- S Other service activities

GVA per job key sector definitions

Manufacturing (excluding chemicals and pharmaceuticals)

The SIC code definition for manufacturing is the same.

Chemicals

The individual SIC2 code for chemicals cannot be looked at in isolation, as the manufacture of coke and refined petroleum products (SIC2 19), chemicals and chemical products (SIC2 20) and basic pharmaceutical products and pharmaceutical (SCI 2 21) is aggregated at the NUTS 2 level.

Energy and environment

The SIC code definition for energy and environment is based on the following SIC2s:

- 19-21: Manufacture of petroleum, chemicals and pharmaceuticals
- 29: Manufacture of motor vehicles, trailers and semi-trailers
- 35: Electricity, gas, steam and air conditioning supply
- 71: Architectural and engineering activities; technical testing and analysis
- 72: Scientific research and development

It is excludes the following SIC codes:

- 8990 the SIC2s 5-9 are aggregated and there are a small number of jobs in SIC5 code 8990 relative to other SIC5s in SIC2 code 8
- 25300 there are a relatively small number of jobs in SIC5 code 25300 relative to other SIC5s in SIC2 code 25

- 27900 there are a relatively small number of jobs in SIC5 code 27900 relative to other SIC5s in SIC2 code 27
- 39000 the SIC2 codes 38-39 are aggregated and there are a small number of jobs in this code relative to SIC2 code 38

Life Sciences (including pharmaceuticals)

The SIC code definition for life sciences is based on the following SIC2s:

- 19-21: Manufacture of petroleum, chemicals and pharmaceuticals
- 29: 72: Scientific research and development

The life sciences sector excludes SIC5 46460, as there are a small number of jobs in the wholesale of pharmaceuticals relative to other SIC5 codes in SIC2 46.

Finance and business services

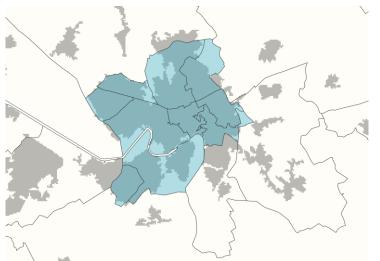

The SIC code definition for finance and business services is the same.

Logistics and distribution

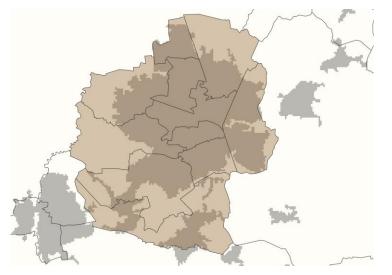

The SIC code definition for logistics and distribution is the same.

Appendices

GVA and hours worked growth

Growth in GVA and the number of hours worked (2011-16)

	Average annual GVA growth (2011-16)	Average annual hours worked growth (2011-16)
Cheshire and Warrington	2.6%	3.0%
Cheshire East	4.0%	3.4%
Cheshire West and Chester	1.7%	2.7%
Warrington	1.4%	3.2%

Productivity by broad sector group in GB

Productivity by broad sector group (2017)

Broad sector	GVA (£m)	GVA per job	GVA per job growth	Jobs
Real estate	£243,527	£447,660	3.3%	544,000
Financial and insurance	£127,432	£122,472	1.3%	1,040,500
Information and communication	£115,346	£89,036	-6.3%	1,295,500
Primary industries, energy water and waste	£66,222	£75,424	12.8%	878,000
Manufacturing	£178,422	£73,334	11.1%	2,433,000
Construction	£108,765	£72,317	1.5%	1,504,000
Transportation and storage	£75,492	£52,903	-0.2%	1,427,000
Professional, scientific and technical activities	£136,945	£52,580	-0.3%	2,604,500
Other services	£68,705	£49,005	5.8%	1,402,000
Public services	£309,656	£39,336	-1.6%	7,872,000
Retail and hospitality	£239,168	£34,806	5.1%	6,871,500
Administrative and support services	£86,866	£31,924	1.2%	2,721,000

Productivity in professional, scientific and technical activities

Productivity by sub-sector in professional, scientific and technical activities (2016)

Sub-sector	C&W jobs	C&W GVA (£m)	C&W GVA per job (£)	GVA per job growth	Difference with GB
Scientific research and development	2,000	£584	292,111	112.2%	268.8%
Activities of head offices; management consultancy activities	15,000	£429	28,598	14.5%	-11.1%
Architectural and engineering activities; technical testing and analysis	13,000	£585	45,019	-8.6%	-15.9%
Other professional, scientific and technical activities	3,750	£161	43,034	-32.9%	-17.3%
Advertising and market research	3,000	£186	61,963	94.3%	-17.9%
Veterinary activities	1,500	£49	32,684	-50.7%	-36.4%
Legal and accounting activities	19,500	£463	23,727	-35.4%	-60.2%

Overall, C&W was 17% less productive than the GB average in professional, scientific and technical activities in 2016; this gap widens to 33% in 2017. Looking at GVA per job in 2016 by sub-sector, this shows that C&W is overperforming GB by almost 270% for scientific research and development. The large increases in productivity since 2011 in this sector are most likely due to large job losses.

However, this does not make up for the fact that it is less productive for all other SIC2 sub-sectors in this broad sector group. It is performing worst for legal and account activities (60.2% less productive) and veterinary activities (36.4% less productive). We also see that these sub-sectors have experienced large declines in productivity since 2011 and both have had large job increases, particularly legal and accounting (10,500 new jobs).

High productivity sub-sectors in GB

Top 15 sub-sectors by productivity for GB (2016)

Sub-sector	GVA (£m)	GVA per job	GVA per job growth	Jobs	Job change	In C&W top sub-sectors?
Real estate activities	£243,990	£460,358	5.5%	530,000	70,500	Yes

WOOD

Population pyramids – 2039 projections

Population pyramids for 2039 projections by LEP

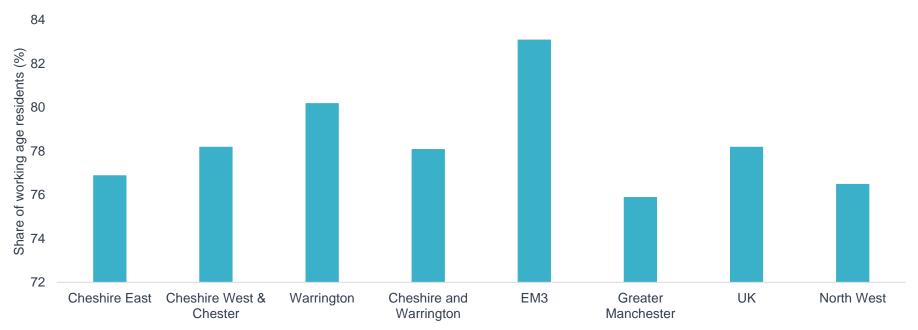

Metro — Dynamics

Appendices

Level of economic activity

Economic activity rate (2017)

The above graph compares the economic activity rates of Cheshire and Warrington with EM3, Greater Manchester, the UK, North West and its three component authorities.

Warrington and Cheshire West & Chester possess greater or equal levels of economic activity to the UK as a whole. However, economic activity in Cheshire East brings down Cheshire and Warrington's overall economic activity to 78.1% which just trails the UK rate of 78.2%.

Although Cheshire and Warrington's economic activity rate is on par with the UK, comparison with the North West demonstrates that it is higher than the regional rate of 76.5%. Notwithstanding, comparisons with other LEPs find that economic activity exceeds Greater Manchester (75.9%) by 2.2% but trails EM3 (83.1%) by a substantial 5%.

If Cheshire and Warrington seeks to lift its

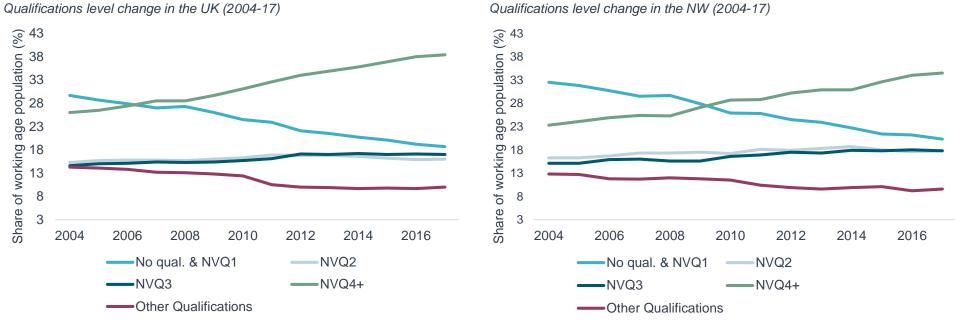

economic activity underutilized parts of the population need to be identified. One such source is the high proportion of early retirees in the area.

If part-time or work from home roles can be developed for this segment of the population, engagement of this workforce is likely to present an opportunity for Cheshire and Warrington.
